1 P R O C E E D I N G S

2 THE COURT: We're on the record in State  
3 versus James Arthur Ray. He is present presented  
4 by Mr. Li, Mr. Kelly, Ms. Do. The state's present  
5 through Ms. Polk and Mr. Hughes.  
6

7 This is the time set for argument on a  
8 motion for mistrial. I'll tell you at the outset  
9 I'll hear the oral argument. I've received a great  
10 deal of briefing in the last two days. I  
11 anticipate that I will consider the matter and  
12 probably have a ruling done by early afternoon.  
13 Just to give you a time frame and what I  
14 anticipate.

15 Ms. Polk, I was informed that you had  
16 other legal issues you wish to raise. I think it  
17 makes sense to take those up conditionally at the  
18 close of the argument on the pending motion.

19 Mr. Li, are you going to --

20 MR. LI: Yes, Your Honor. May I approach the  
21 lectern?

22 THE COURT: You may.

23 MR. LI: Your Honor, at issue here is a report  
24 or an email drafted by an environmental engineer  
25 that states two relevant factors. One, that carbon  
dioxide and not heat stroke is a possible cause of

1 death for the three decedents; and, secondly, that  
2 various environmental conditions created by the  
3 design of the sweat lodge, for which Mr. Ray has no  
4 responsibility, could have contributed to those  
5 deaths.

6 When we initially filed this motion, the  
7 team got together and we thought that what we would  
8 do is submit the pleadings to the Court and simply  
9 say, Your Honor, it's a fairly clear violation of  
10 Brady and the only issue we need to talk about is  
11 what the remedies are.

12 Then yesterday we received the state's  
13 pleading, which I will describe as aggressively  
14 unrepentant. And --

15 THE COURT: Mr. Li, I just want to say right  
16 at the outset I'm going to ask -- as I did  
17 previously, I'm going to ask both parties confine  
18 this to legal argument, straight legal argument.  
19 And I'm going to insist on that.

20 MR. LI: I appreciate that. And I will, Your  
21 Honor.

22 And as a consequence, we felt it  
23 necessary to respond to each of the arguments made  
24 and lay out our legal argument. And per the  
25 Court's instruction, I apologize for overstepping

1 already. But I had intended to say to the Court  
2 that I will constrain myself in solely the legal  
3 argument. That will be my effort here, Your Honor.

4 Let's talk about what's not in dispute.  
5 What's not in dispute is that there are three  
6 factors that the Court must find to find that under  
7 Brady the due process clause has been violated.

8 The first is that the government  
9 suppresses evidence. The second is that the  
10 evidence is favorable to the defense. And the  
11 third is that the evidence is material. And I'm  
12 going to address each of those elements. And I  
13 think in addressing them I'll also address a number  
14 of the arguments made by the state.

15 Let's talk about what's not in dispute.  
16 What's not in dispute is, one, in April 2010 the  
17 government corresponded with an expert that had  
18 been provided by the plaintiff's lawyers in this  
19 case -- who is an environmental expert.

20 Two, that these communications include an  
21 April 29, 2010, email, which is attached to our  
22 motion as Exhibit A.

23 Three, that the communications also  
24 appear to have included a subsequent brief, quote,  
25 unquote, interview of Rick Haddow conducted by the

1 state. And as a result of this interview, the  
2 state, quote, unquote, determined he could be an  
3 appropriate witness as to the air quality and  
4 environment within the sweat lodge. That's at the  
5 state's motion, page 4.

6 Four, the expert appears to have a  
7 background in environmental engineering, which  
8 appears to include regulatory work related to  
9 toxins and hazardous material and air quality.

10 Your Honor has I think at -- in the  
11 state's 15th disclosure Mr. Haddow's CV, which I  
12 will provide also to the Court for the Court's  
13 convenience. But it's quite extensive.

14 And if I may approach with the CV.

15 It's quite extensive. I won't go into  
16 all of the details. But Mr. Haddow sets forth,  
17 fairly significant qualifications. We've not had  
18 an opportunity to test any of them. We don't know  
19 what his real background is or any of that.

20 But just based on the CV, he does appear  
21 to be what he claims to be, which is an  
22 environmental engineer who deals with air quality  
23 issues. He appears to have government positions  
24 previously in Maricopa County, and he seems like a  
25 serious guy. I don't know who he is. We've never

1 interviewed him. We haven't had the chance to test  
2 any of that.

3 What's also not in dispute is that on  
4 October 27, 2010 -- this is after the April 29,  
5 2010, email and after the brief interview of Rick  
6 Haddow and after he provided his CV to the state  
7 and then the state provided it to all of us -- the  
8 state listed Mr. Haddow as an expert who had  
9 examined evidence in this case. And that's the  
10 state's 15th disclosure.

11 This disclosure also states that, quote,  
12 unquote, no report was prepared in this case. The  
13 record is also clear and not disputed that the  
14 defense made four separate requests, specific and  
15 explicit requests, in writing for all statements by  
16 Mr. Haddow. These requests were on November 18,  
17 2010, December 7, 2010; February 4, 2011, and  
18 March 31, 2011. They are attached to our motion as  
19 exhibits C, D, F and G. And I can give the page  
20 cites as well.

21 They are explicit. They ask for  
22 information about this particular expert. It's  
23 also undisputed that the state replied to not one  
24 of these requests, not one, with a possible  
25 exception of the very last one, in which they

1 handed over this report.

2 It's also undisputed, Your Honor, on  
3 December 1, 2010, this court ordered, quote, the  
4 state's obligations under Rule 15(1)(b)(4) apply to  
5 all experts regardless of whether or not the state  
6 intends to call the expert at trial and arises once  
7 this expert has considered any evidence in the  
8 particular case.

9 The state is -- it's also undisputed that  
10 the state did not produce Mr. Haddow's, quote,  
11 unquote, summary of environmental conditions until  
12 last week, eight weeks into trial.

13 So let me address first the -- all those  
14 facts are undisputed, Your Honor. Let me just  
15 address the first prong of the Brady violation,  
16 which is that the government suppressed evidence.

17 There is no dispute that the state failed  
18 to disclose this evidence that is subject to the  
19 motion despite four separate requests by the  
20 defense and despite the Court's order of  
21 December 1.

22 As the United States Supreme Court has  
23 stated in U.S. v. Agurs, quote, when a prosecutor  
24 receives a specific and relevant request, the  
25 failure to make any response is seldom if ever

1 excusable.

2 The state never responded to Ms. Do's  
3 repeated and explicit requests. Again, it's  
4 Exhibit C at page 4, Exhibit D at page 1, Exhibit F  
5 at page 6, Exhibit G at page 2.

6 With respect to Exhibit C, Your Honor,  
7 when we were copying the exhibits, there was an  
8 error, and several of the pages were omitted. And  
9 as a consequence we filed a supplement which  
10 includes the entire letter. The supplement is  
11 called "Addendum to Motion."

12 And if Your Honor would like, I can  
13 approach with a copy of it.

14 THE COURT: It was filed on the 12th. I have  
15 that.

16 MR. LI: Thank you. At page 4, I just point  
17 this one out for example, it says, additionally,  
18 Mr. Ray requests any and all statements made by  
19 Steven Pace and Richard Haddow, and cites the  
20 various rules.

21 This is all in addition to the standard  
22 Brady requests that defense always makes in every  
23 case. These are specific requests for notes and  
24 statements by Mr. Haddow. And they are all as  
25 explicit as the statement in this first letter of

1 November 18, 2010.

2 Now, the reasons for these rules, Your  
3 Honor, is clear. The prosecution has a duty not  
4 just to win a case but to ensure that justice is  
5 done. For this reason Arizona law sweeps even more  
6 broadly than the supreme court. Arizona Supreme  
7 Court has stated, simply stated, the rule is that  
8 the prosecution must turn over to the defendant  
9 full information regarding any exculpatory evidence  
10 it possesses. This is State v. Jones.

11 And as a caveat to prosecutors, if you  
12 are in doubt as to whether or not a defendant knows  
13 of certain exculpatory evidence already known to  
14 the state, reveal it.

15 There is no dispute that the state knew  
16 about Mr. Haddow's statement as of about April 29,  
17 2010. There is no dispute that the state then  
18 interviewed him in determining whether or not he  
19 should be an expert. There is no dispute that  
20 based on those interviews they decided that he  
21 would be an expert.

22 There is no dispute that the state then  
23 listed him as an expert on October 27. There is no  
24 dispute that the defense made four separate,  
25 explicit requests for discovery on Mr. Haddow.

1 There is no dispute that the state ignored these  
2 requests until perhaps the very last one.

3 There is no dispute that after the second  
4 request for discovery by Ms. Do on December 1,  
5 something like that -- I'm sorry. Strike that.  
6 December 7, the second request on December 10,  
7 three days later, the state withdrew Mr. Haddow as  
8 a witness.

9 There is no dispute that on December 1,  
10 2010, the Court made its ruling regarding  
11 communications with experts. And there is no  
12 dispute that the state failed to disclose the  
13 Haddow communications until last week.

14 Now, the state says this was inadvertent.  
15 First, as a matter of law, that's irrelevant. It  
16 also calls into question what even "inadvertent"  
17 means. Because in this particular case, the  
18 evidence is somewhat different than inadvertence.  
19 Because the facts are that despite repeated  
20 requests from the defense for this specific item,  
21 the state chose not to respond and not to produce  
22 information.

23 And I'd ask the Court to look at Bagley,  
24 the United States Supreme Court case, 473 -- I  
25 don't have the general page cite. But the PIN cite

1 is 682 and -83. This is the supreme court  
2 speaking: An incomplete response to a specific  
3 request not only deprives the defense of certain  
4 evidence, but also has the effect of representing  
5 to the defense that the evidence does not exist.

6 Now, third, the state also affirmatively  
7 presented to this court and to the defense that no  
8 report had been created by this expert,  
9 notwithstanding the fact that they have had in  
10 their position an email that they will state is not  
11 a report, but just an email, but an email that  
12 identifies a different cause of death and a  
13 different mechanism, the construction of the lodge.

14 This is exactly the type of concern that  
15 the Bagley court -- the United States Supreme Court  
16 in Bagley was concerned about. This is exactly the  
17 problem that the United States Supreme Court was  
18 concerned about.

19 Quote, the prosecutor's failure to  
20 respond fully to a Brady request may impair the  
21 adversarial process. And the more specifically the  
22 defense requests certain evidence, thus putting the  
23 prosecutor on notice of its value, the more  
24 reasonable it is for the defense to assume from the  
25 nondisclosure that the evidence does not exist and

14

1 to make pretrial and trial decisions on the basis  
2 of this assumption.

3 It is simply not enough, Your Honor, to  
4 claim in this context that this was inadvertent,  
5 that it was a mistake. It might have been an error  
6 in judgement. But it is clear that the state knew  
7 of these various statements by Mr. Haddow.

8 It is clear they made strategic decisions  
9 based on those statements. It's clear that they  
10 made further strategic decisions about whether  
11 Mr. Haddow could be a witness based on an  
12 interview, the details of which we still don't  
13 have. They made a decision to list him as an  
14 expert.

15 And it is also clear that we made  
16 numerous requests. And after the second request  
17 they withdrew Mr. Haddow as a witness.

18 The Court doesn't need to find at this  
19 stage -- does not need to resolve whether this is  
20 an intentional or unintentional gap on the part of  
21 the state. What is relevant for the question of  
22 the Brady violation -- and the remedies we can  
23 discuss later. But what is critical for this court  
24 to determine as to whether or not there is a Brady  
25 violation is just simply did the state know about

1 it and did they not produce. The answers are  
2 affirmative. They knew. They did not disclose it.

3 The second factor, Your Honor, relates to  
4 whether or not this information is favorable to the  
5 defense. And I would submit, Your Honor, that on  
6 its face it is. But I will -- because of the  
7 state's position that it's, in fact, inculpatory  
8 and not exculpatory, we feel compelled to make at  
9 least some proffer and set the record why this is  
10 favorable to the defense.

11 I think as the Court and everybody in  
12 this courtroom is aware, we've had at least three  
13 themes in this case. The first is relating to the  
14 state's -- I'll eschew rhetoric -- but the nature  
15 of the state's investigation, the fact that they  
16 were focused on Mr. Ray from the start and that  
17 they overlooked other leads, purposefully.

18 I think the second basic theme of this  
19 case is that Mr. Ray didn't cause the deaths.  
20 There was a superseding, intervening cause and that  
21 the state cannot prove beyond a reasonable doubt  
22 and cannot meet its burden that Mr. Ray caused  
23 these deaths.

24 And the third fairly fundamental theme  
25 that has been throughout this case is that the

16

1 state can't meet its burden that Mr. Ray knew  
2 people were dying. And the Haddow report or  
3 summary of environmental conditions, whatever we  
4 want to call it, is relevant to all three themes.

5 With respect to the investigation, it is  
6 now clear that as of April 29, 2010, the state was  
7 aware of the following facts, or at least the  
8 following opinion offered by an expert, whose CV  
9 I've handed the Court -- who, for all we know, is a  
10 valid -- you know -- environmental engineer.

11 So what the state knew on April 29, 2010,  
12 is that an environmental engineer hired by the  
13 plaintiffs -- and I want to note one thing for a  
14 second, Your Honor. It is also a Brady violation  
15 that they did not indicate in their disclosure that  
16 their source of this particular witness was a  
17 plaintiff's lawyer who is suing Angel Valley and at  
18 the time Mr. Ray. So that also has relevance to  
19 that particular witness's bias and what have you.

20 But we'll put that aside for a second and  
21 focus on what conclusions this particular expert  
22 came up with.

23 First, that all three decedents, not just  
24 Ms. Neuman, as stated in the government's papers --  
25 if you look at bullet point 4, you will see that

1 this expert opines as to all of the decedents. All  
2 of the decedents could have died from CO2  
3 poisoning. That is a different cause of death than  
4 the heat stroke being alleged by the state.

5 The second major point -- and there is a  
6 number of them in the bullet point. And the Court  
7 has it as Exhibit A. The second point is because  
8 of the design of the sweat lodge, a certain section  
9 of the lodge, quote, unquote, experienced hazardous  
10 concentrations of CO2 and experienced a  
11 radiant-heat barrier that would greatly contribute  
12 to the section's air stagnation and build up of  
13 CO2.

14 And I would add to that, Your Honor, any  
15 other toxins that might have been present would  
16 not -- would also not be ventilating as a result of  
17 this radiant-heat barrier that this environmental  
18 engineer looking at the structure believed was  
19 there.

20 This would also severely limit  
21 ventilation and air exchange. So this is another  
22 fact that the state knew at least as of  
23 April 29, 2010.

24 Further, Mr. Haddow opines that the  
25 lodge's construction created a near airtight

1 structure. That's another point that the state was  
2 aware of on October -- April 29, 2010.

3 And that the rock pit radiant heat would  
4 create positive pressure inside the lodge that  
5 would lessen the lodge's ability to exchange inside  
6 air to outside, ambient air.

7 The point I'm making, Your Honor, is that  
8 as of April 29, 2010, the state was aware of an  
9 expert witness, who they eventually listed as a  
10 witness, who would say that the design and  
11 materials used by the sweat lodge, one, may have  
12 caused the decedents to die of carbon dioxide  
13 poisoning.

14 What that means, Your Honor, is as of  
15 April 29, 2010, the state was aware of yet another  
16 expert who thought there was some other cause of  
17 death, and not only that, who thought that  
18 something for which Mr. Ray has never had any  
19 responsibility for, which is the design,  
20 construction, materials used, et cetera.

21 If we've proved anything, we've proved  
22 that fairly well. And Mr. Ray has had nothing to  
23 do with any of that.

24 So at least as of April 29, 2010, the  
25 state was on notice that they had an expert who

1 said, who suggested, a different cause of death  
2 and, frankly, a different culpable party.

3 Now, I'm not saying that the Hamiltons  
4 are criminally culpable for this. Okay? But I am  
5 saying that at least as of that date, the state was  
6 on notice that the Hamiltons perhaps were a  
7 superseding, intervening cause of what happened at  
8 the sweat lodge ceremony.

9 But the state did nothing with this  
10 information. They didn't share it with the medical  
11 examiners who testified, or one of whom testified.  
12 They didn't share it with the treating doctors.  
13 They didn't share it with their new medical expert,  
14 Dr. Dickson. They didn't follow up with the  
15 Hamiltons about this particular design. They  
16 didn't follow up with the Mercers specifically  
17 about this particular design.

18 And, of course, Your Honor, one critical  
19 fact that needs to be acknowledged in this  
20 particular case is that on October 10, less than 48  
21 hours after the accident, after three -- after two  
22 people died and one would soon die, the sweat lodge  
23 was destroyed by the Hamiltons.

24 So the ability to test any of  
25 Mr. Haddow's theories about whether a radiant-heat

1 barrier was created by the particular pit or  
2 whether the particular construction, the way -- the  
3 materials used, et cetera, and the way it was  
4 designed, whether that actually could have  
5 contributed to the deaths of the three decedents --  
6 that's all gone forever.

7 So the bottom line on this one point,  
8 this one theme, is that it supports the fact that  
9 the state knew this information and disregarded it  
10 and didn't use it and, frankly, sat on it until a  
11 week ago lends credence to the defense theory that  
12 has been articulated throughout this case that the  
13 state always looked at Mr. Ray from day one. The  
14 way I put it in opening, Your Honor, the state  
15 looked in one direction and one direction only.

16 As a sidenote, the fact that Mr. Haddow  
17 also believes that heat killed the decedents does  
18 not alter his conclusions. He says everything in  
19 there. And there is case law about cherry picking  
20 facts in determining whether or not a particular  
21 report is exculpatory or inculpatory. And I'll get  
22 to that in a second.

23 The fact is that we gave the report to  
24 the Court in good, bad and ugly. But the bottom  
25 line is there are those elements that I described.

1 The second element of our defense has  
2 been, of course, causation, that the state has  
3 failed to prove beyond a reasonable doubt that  
4 Mr. Ray caused the three folks to die.

5 And Ms. Do has elicited testimony from  
6 various medical examiners suggesting that issue,  
7 and we have been pushing on that point.

8 Now, it is also relevant to that same  
9 cross-examination that would have been done with  
10 every expert that has -- every medical doctor who  
11 has showed up here and, frankly, almost every other  
12 witness who has shown up here. There would have  
13 been cross-examination about this particular issue,  
14 whether or not the radiant-heat barrier created  
15 certain environmental conditions.

16 And remember that the state must prove  
17 beyond a reasonable doubt that it was not a  
18 superseding, intervening cause that caused these  
19 folks to die. And that's something that we argued  
20 about last week, Your Honor, with the state, about  
21 whether or not at this stage in the trial, after  
22 all this evidence about causation, whether or not  
23 we should have that instruction read or some form  
24 of that instruction read.

25 Well, the fact that it wasn't read -- it

1 may be read. We can -- that's passed. But what  
2 isn't passed is that causation. The state's burden  
3 on causation has been something we've been pushing  
4 on from day one and that this report is directly  
5 relevant to.

6 The third theme of the defense that the  
7 Court has heard repeatedly is the theme about  
8 knowledge. And this relates to the fact that  
9 Mr. Ray sitting on one side of the lodge doesn't  
10 know what's happening on the other side of the  
11 lodge, and, in fact, does not know better than  
12 those people who are sitting right next to the  
13 people at the other side of the lodge. The Court  
14 has heard evidence about conversations which took  
15 place between people on the other side of the  
16 lodge.

17 Now, we have argued that Mr. Ray did not  
18 know that people were dying. Now, it is entirely  
19 relevant to that discussion that, according to  
20 Mr. Haddow, there is environmental conditions that  
21 create different conditions where Mr. Ray is seated  
22 as opposed to those conditions on the other side.  
23 Not just heat, but also the ability to circulate  
24 air and the buildup of toxins and what have you.

25 And Mr. Ray is not aware of any of those

1 because he didn't design this. And there is no  
2 evidence that the government can produce or will  
3 produce that Mr. Ray somehow knew that this  
4 concealed defect was creating these hazards on the  
5 other side of the sweat lodge.

6 And so it is not true, as the state  
7 alleges in its brief, that this report is, quote,  
8 unquote, inculpatory as opposed to exculpatory.  
9 These are direct -- this report is directly  
10 relevant to the themes that we've raised throughout  
11 this case.

12 And the idea that the state can cherry  
13 pick parts of Mr. Haddow's report has been  
14 addressed specifically by the ninth circuit in a  
15 case called "Bailey v. Rae." I may have a copy  
16 that I can bring up. It is 339, F.3d, 1107. It's  
17 a ninth circuit case, 2003.

18 And if I may approach Your Honor with a  
19 copy of the case?

20 THE COURT: You may.

21 MR. LI: This exact issue about cherry picking  
22 facts out of a report to claim it's inculpatory as  
23 opposed to exculpatory, Bailey v. Rae 1115, in  
24 which the Court addressed exactly this issue.

25 The Court said the state downplays the

1 exculpatory nature of the evidence by cherry  
2 picking isolated references from the report. We  
3 find this approach unavailing. To say that  
4 evidence is exculpatory does not mean that it  
5 benefits the defense in every regard or that the  
6 evidence will result in the defendant's acquittal.  
7 Rather, the preliminary inquiry in a Brady claim  
8 has always been whether or not the evidence is  
9 favorable to the accused.

10 The Court cites United States v. Howell,  
11 231 F.3d, 615 at 625, another ninth circuit case,  
12 2000. Quote, that the information withheld may  
13 seem inculpatory on its face in no way eliminates  
14 or diminishes the government's Brady duty.

15 So it is irrelevant for purposes of this  
16 court's analysis how the government chooses to  
17 describe this particular report. The Court must  
18 look at the report and say is this usable by the  
19 defense? I'd submit that that is absolutely -- the  
20 actual language in there fits well within the  
21 various themes that are raised by the defense.

22 The state also seems to believe in its  
23 pleading that because Mr. Haddow was never retained  
24 by the state and paid, that the state somehow had  
25 no Brady obligation relating to his report or

1 email.

2 First of all, as a matter of law, that's  
3 simply wrong. There is a fair amount of effort  
4 spent in the brief describing how Mr. Haddow was  
5 never actually retained and was never actually  
6 paid. That fact is simply irrelevant.

7 It doesn't matter whether a witness is  
8 paid or not if that witness has exculpatory  
9 information. That's not relevant.

10 Second, it's belied by the facts. The  
11 state actually listed this man in its 15th  
12 disclosure as an expert who had examined evidence.  
13 This court's ruling in December of 2010 also  
14 directly addresses whether or not this particular  
15 expert who examined reports, whether he's going to  
16 be called or not, that his notes need to be  
17 disclosed. And that was this court's ruling.

18 The Court -- the state also appears to  
19 argue that Mr. Haddow's summary of environmental  
20 conditions was preliminary, and because of the fact  
21 it was preliminary, it did not need to be  
22 disclosed. Again, that's simply wrong on the facts  
23 and wrong on the law.

24 Just as an initial matter, Brady is Brady  
25 whether it's preliminary or not. And, frankly,

1 many cases find preliminary reports to be highly  
2 exculpatory because they suggest different things  
3 than subsequent reports.

4 And I would cite to the Court State v.  
5 Vilardi. This is in our brief. At 76 New York, or  
6 N.Y. 2d, 67, 1990.

7 This is a Brady violation where the state  
8 failed to disclose an expert report indicating that  
9 the expert had been unable to find evidence of  
10 arson during his initial inspection.

11 Another case is Paradis v. Arave, 130  
12 F.3d 385, ninth circuit case in 1997, also cited in  
13 our brief. The Court found a Brady violation where  
14 the prosecutor failed to disclose that the medical  
15 expert who testified at trial that the victim was  
16 killed in a certain place had initially opined that  
17 the victim was killed somewhere else or that he had  
18 not been killed in -- it was a creek.

19 Secondly, this is belied by the fact that  
20 repeatedly the state has disclosed reports that on  
21 their face are stated as preliminary.

22 And I will -- if I may approach, I'm  
23 going to hand the Court two examples. One is a  
24 report from a medical expert that the state intends  
25 to call -- Dr. Dickson. And this is January 10,

1 2011. It's entitled "Preliminary Report."

2 There is another report which was  
3 subsequently amended but was also produced to us as  
4 an expert report relating to Steven Pace, who is  
5 not going to testify, but who there was disclosure  
6 given to us. And it's a draft report. This report  
7 was subsequently amended and the "draft" removed.  
8 But the state knows that a preliminary report from  
9 an expert should be disclosed.

10 I would also cite these IMEs for  
11 Ms. Spencer and Mr. Mehravar. These are  
12 independent medical examinations of these two  
13 witnesses -- Mr. Mehravar. You remember  
14 Mr. Mehravar. And Ms. Spencer, who has not yet  
15 testified. These are reports that were provided to  
16 the state by the plaintiffs' lawyers involved in  
17 those cases.

18 Now, I think the Court will recall --  
19 just a sidenote. I think the Court will recall  
20 that the state and I had a dispute over whether or  
21 not I could use the lawsuits in this case. And it  
22 was represented that it was unfair surprise to the  
23 state about this particular lawsuit. And  
24 specifically had to do with Mr. Mehravar. And now  
25 Mr. Mehravar's lawyer had, in fact, provided to the

1 state an independent medical examination of  
2 Mr. Mehravar in connection with his lawsuit well  
3 before the trial even began.

4 But the limited point I'm making here for  
5 purposes of this argument, Your Honor, is that  
6 report is also described as a "preliminary report."

7 So the idea that preliminary somehow  
8 washes the report of any -- washes the government  
9 of a ready obligation is wrong on the facts and  
10 wrong on the law.

11 The third element that we must prove --  
12 and I have to tell the Court I appreciate the  
13 Court's patience with this argument. It's a very  
14 important issue for Mr. Ray. I appreciate the  
15 Court's indulgence on us setting this record. I  
16 really do.

17 The third element is materiality. First  
18 of all, there is a common sense issue here. And  
19 this common sense issue, as is often the case, is  
20 born out by the case law. And the common sense  
21 issue is that there is a qualitative difference,  
22 Your Honor, between the opinions and observations  
23 of an expert and the opinions and observations of  
24 lay witnesses. There is a qualitative difference.

25 And if the Court looks at a number of

1 cases -- I cite again the Vilardi case and the  
2 Paradis case. And I'll also cite Benn v. Lambert,  
3 283 F.3d 1040, ninth circuit, 2002.

4 There, as I said, a qualitative  
5 difference when courts examine the failure to  
6 disclose an expert's opinion as opposed to the  
7 failure to disclose some minor piece of impeachment  
8 evidence or the failure to disclose something that  
9 is truly cumulative of the same point.

10 And that's because by definition, experts  
11 have knowledge that common folks don't. They can  
12 look at a structure and they can determine whether  
13 or not because of the design of the structure  
14 certain environmental conditions were present or  
15 not present. They can look at blood, for example,  
16 and determine whether -- about the DNA.

17 And the state spent perhaps almost all of  
18 its brief, essentially, from page 5 to 14, on the  
19 suggestion that well, there is no harm, no foul,  
20 because actually the defense knew about the design  
21 of the sweat lodge and that CO2 might have been the  
22 cause of death.

23 The state cites five pages of lay  
24 witnesses who said it was hot on one side and not  
25 as hot on the other. Although the Court has heard

1 contrary testimony from other witnesses who, in  
2 their subjective opinion, thought one side was  
3 hotter than another. And so even that's not  
4 particularly clear.

5 But more importantly, that's just lay  
6 opinion about how they personally, subjectively  
7 perceived the temperature, as opposed to an  
8 expert's opinion that the design created certain  
9 physical facts, air quality facts, that are  
10 relevant to this case.

11 A computerized diagram that just has not  
12 much more to it. The state also cites the musings  
13 of a guy named Mr. Sundling, who apparently has an  
14 interest in this case, whose qualifications are,  
15 essentially, unknown other than he maintains a blog  
16 about this case. And who has also been listed as  
17 an expert by the state.

18 This is just some guy, I think, in  
19 Indiana or something like that, who maintains a  
20 blog, has read all the reports in this case, and  
21 somehow that witness is the same as doctor or  
22 Mr. Haddow.

23 Another amazing fact is the state also  
24 cites a June 16, 2010, interview with  
25 Detective Diskin. And I believe Mr. Hughes was

1 present at that interview. I don't recall whether  
2 it was Mr. Hughes or Ms. Polk. I believe it was  
3 Mr. Hughes who was present at that interview.

4 And we asked the detective, tell us  
5 everything looked at to tell us what could have  
6 caused these deaths. And he said carbon monoxide.  
7 And then he said carbon dioxide. And I'll be frank  
8 with the Court. When we heard that, we just got it  
9 wrong and was mixing up carbon monoxide and carbon  
10 dioxide.

11 So we asked for clarification. Do you  
12 mean carbon dioxide or carbon monoxide? And he  
13 said, carbon dioxide. And he knew what he was  
14 talking about, because less than a month and a half  
15 earlier, he had received that email from Mr. Haddow  
16 in which Mr. Haddow says carbon dioxide is a  
17 possible cause.

18 I don't know whether or not the  
19 detective, Detective Diskin, had a subsequent  
20 conversation close to that interview in which  
21 further information about carbon dioxide was  
22 shared.

23 What the detective did not say -- what  
24 the detective knew and did not say and what the  
25 state's attorneys watched happen and remained

1 silent was the detective did not say, hey. I  
2 consulted with an environmental expert who says --  
3 we don't know if we're going to use him or not.  
4 But we consulted with an environmental expert who  
5 said carbon dioxide is a possible cause of death  
6 because of the environmental conditions inside the  
7 sweat lodge.

8 The detective did not say that to us. He  
9 artfully phrased his question, just answered only  
10 exactly what was asked. We had no way of knowing.  
11 And the state, whichever lawyer was sitting there,  
12 just didn't say a word, didn't say a word.  
13 Notwithstanding the fact that the Brady obligation  
14 was triggered on April 29, 2010.

15 The state also cites the preliminary  
16 reports relating to the lawsuits of Sidney Spencer  
17 and Mehravar that I've already gone over.

18 The state also cites Stephen Ray's  
19 medical records in its report -- or in its brief.  
20 Stephen Ray's medical records do have some vague  
21 mention to carbon dioxide in connection with carbon  
22 monoxide and in connection with other toxicities.

23 And Stephen Ray is the participant whose  
24 treating doctor concluded he did not have heart  
25 stroke. We had a whole back and forth in this

1 courtroom about whether carbon dioxide in that  
2 report with was somehow an error and whether they  
3 meant to say carbon monoxide or whether it was a  
4 transcription error.

5 But all the while while we're having this  
6 conversation with Stephen Ray, the state knows and  
7 has in its possession this environmental report  
8 from Mr. Haddow saying it's it could be carbon  
9 dioxide. And there is no attempt to clear that up  
10 ever.

11 And, moreover, Mr. Ray's reports, Stephen  
12 Ray's medical reports, are only produced on  
13 February 4, 2011, what, 12 days before trial  
14 starts, and only because the defense requested them  
15 in January. They were requested actually for quite  
16 some time. But once again requested the full  
17 reports of Stephen Ray in January 2011, a month or  
18 so before the trial.

19 Now, remember, one the critical factors  
20 of this is that -- I think the record on that is  
21 fairly clear. But one of the ironies of this  
22 argument is that the state has concluded and  
23 repeatedly argued that these records that discuss  
24 toxic exposure and carbon dioxide, possible  
25 toxidromes and what have you, this -- the state has

1 said -- you know -- that actually is all a red  
2 herring -- you know. It's all just something that  
3 the defense has made up, as good defense attorneys  
4 do, to create just some -- you know -- flash and  
5 bang in the courtroom and to try and mislead the  
6 Court and the jury.

7 And what's ironic about that argument is  
8 while they're making that argument, they have in  
9 their possession something that they asked for and  
10 that they then listed a guy as an expert that says,  
11 you know what. It could be toxicity. Carbon  
12 dioxide is toxicity. And you know what. It could  
13 be the construction of the lodge.

14 So while we ar being called, whatever,  
15 while all those things are happening, the state  
16 knows that there is contrary evidence in its own  
17 files.

18 Finally, the state lists the civil  
19 lawsuits as evidence that we should have been on  
20 notice of something. That's just -- it's, again,  
21 wrong on the law, wrong on the facts. The facts  
22 are that each of the lawsuits don't talk about  
23 what's in Mr. Haddow's report. They don't talk  
24 about a radiant-heat barrier. It's not -- it's a  
25 lawsuit. It's not an expert opinion.

1 And, moreover, it's just not the case  
2 that these lawsuits put somebody on notice that  
3 there might be in the state's file an expert  
4 report. That's just simply -- these are -- it's  
5 talking in completely the wrong direction.

6 Now, what the state attempts to do with  
7 that nine pages, some-odd, of information is to  
8 claim that well, no harm. No foul. You heard from  
9 three or four lay witnesses that they thought it  
10 was really hot on one side versus another. No  
11 harm. No foul. There is no Brady violation. It's  
12 not exculpatory. Let's just keep going. Don't  
13 worry about it.

14 That's not what the law is, Your Honor.  
15 As an initial matter, while the cases do require  
16 the defense to do some due diligence, this  
17 typically involves things that are easily and  
18 publicly available to everybody. Okay?

19 It does not involve us divining that the  
20 state has in its file a report. What the state --  
21 what the courts suggest, Your Honor, in these types  
22 of circumstances where the issue is not some random  
23 fact or something, but rather a piece of discovery  
24 that exists in the state's files, the remedies and  
25 procedures that the courts suggest is discovery,

1 making specific, articulate requests for specific  
2 information relating to specific people. That's  
3 what the courts say.

4 Hey. Look. If you don't have it, and  
5 you want it, use the discovery process to get it.  
6 And that's exactly what we did, Your, Honor, four  
7 separate times.

8 The Court remembers, I believe, the  
9 various discovery battles we had about experts and  
10 reports and relating to the medical examiners  
11 relating to the meeting the state had with the  
12 medical examiners in December 2009.

13 The Court -- we briefed that, argued it,  
14 also availed ourselves of all the other mechanisms  
15 of discovery, writing four separate letters  
16 specifically asking for statements by Mr. Haddow by  
17 name.

18 More fundamentally, what the state never  
19 addresses in its briefing is the basic difference  
20 between expert testimony and lay observations. The  
21 state also never addresses the difference between  
22 an expert opinion and allegations in the lawsuit.  
23 The state never addresses the difference between an  
24 environmental conditions expert who would testify  
25 about, frankly, Your Honor, cause and medical

1 opinions which would, essentially, talk about the  
2 effect.

3 And, most importantly, what the state  
4 never addresses in its brief is the impact of their  
5 statement to this Court and the defense in  
6 disclosure 15 that no report had been prepared.

7 And if I may just use a brief analogy.  
8 It would be as if the state had photographs of a  
9 crime scene with blood spatters all over the wall,  
10 including perhaps some of the defendants. And then  
11 the state had an expert in that -- they met  
12 somehow, who tested some of the blood, examined  
13 some of the evidence, and said you know what. That  
14 blood is not the defendant's. Exculpatory evidence  
15 that's not obviously observable by a layperson but  
16 an expert's opinion.

17 So they have this, but they didn't retain  
18 him. It was in the civil case relating to this.  
19 And so they had this email from the guy who says --  
20 you know -- it's not the defendant's blood. But  
21 they never retain him. It's just an email. It's  
22 not a report.

23 And then the state says well -- they  
24 interview the guy. And then they decide well,  
25 let's list him as an expert. He might be useful.

1 He makes other conclusions about blood and what  
2 have you. He might be useful for us.

3 And then they write in this same case,  
4 when they disclose him there is no report drafted.  
5 And then when the defense makes specific requests  
6 relating to that specific witness, the state  
7 withdraws him as a witness and never releases the  
8 email, we'll call it, in which he says, I looked at  
9 the blood. It's the not the defendant's blood.

10 The Court would look at that, I believe,  
11 and find a clear, knowing, purposeful, strategic  
12 Brady violation. And it is very difficult for me  
13 to see how our current situation -- obviously I've  
14 reasoned it a little extreme. I'm using blood and  
15 DNA.

16 But it's very difficult for me to see how  
17 these general -- these general analogies are  
18 different.

19 Finally, on the point of cumulativeness,  
20 which the state says -- the state makes the  
21 representation that this expert's opinion is  
22 cumulative to those lay observations of various  
23 witnesses and others about potential CO2 poisoning,  
24 the positioning of the pit and what have you.

25 This also fails as a matter of law. We

1 have a number of cases on this. I cited already  
2 Bailey v. Rae. The Court noted, quote, the state's  
3 answer to the materiality question is that the  
4 suppression of Ford's -- this is the expert. The  
5 expert's report could not have prejudiced Bailey,  
6 the defendant, because the reports were merely,  
7 quote, cumulative of testimony given by the victim  
8 herself.

9 So this is the state saying lay testimony  
10 rendered the expert opinion cumulative.

11 Rejecting this argument, the Court  
12 commented, cumulative evidence is one thing.  
13 Unique and relevant evidence offered by a  
14 disinterested expert is quite another.

15 By summarily dismissing the Ford report,  
16 the expert report, as cumulative, the state court  
17 fundamentally mischaracterized their nature and  
18 significance.

19 And I would note, Your Honor, many of the  
20 cases that we're citing here are habeas cases,  
21 which are on a very different standard, as the  
22 Court is aware, than just direct appeal. And so  
23 it's a much higher standard.

24 And in this particular case, the ninth  
25 circuit said that the state court erred by

1 accepting the state's argument that an expert  
2 opinion was cumulative to those of lay witnesses.

3 I'd also cite another case, Your Honor.  
4 Boss v. Pierce, which is at 263 F.3d, 734. And if  
5 I have another copy, I'll hand it out.

6 And this stands for the same proposition,  
7 which is that a statement was not cumulative when  
8 it was provided by a disinterested witness. The  
9 Court also found error. And this statement was  
10 actually disclosed before trial.

11 And, Your Honor, if I may approach?

12 THE COURT: Yes.

13 MR. LI: Thank you.

14 And, Your Honor, this cumulative argument  
15 the state makes also misses a fundamental aspect of  
16 the defense that we've proffered here, which is  
17 that -- and the materiality of the fact that these  
18 reports or this report was sitting in the state's  
19 file is a central element to our defense. And this  
20 cumulative argument fails to address that.

21 That argument, again, is that they had  
22 evidence of other causes and they just ignored it.  
23 So simply the fact that various witnesses say it  
24 was hot on one side versus another or these  
25 lawsuits or whatever, even if the Court were to

1 find that somehow that puts on us on some  
2 investigatory duty, which I think would be contrary  
3 to the law -- even if the Court found that, it  
4 fails to address the central idea that the state  
5 was aware of exculpatory information suggesting  
6 another cause of death, suggesting another party  
7 perhaps responsible, suggesting a superseding,  
8 intervening cause and did nothing with it, shared  
9 it with nobody.

10 Your Honor -- and, again, I appreciate  
11 the Court's time on this. Obviously an  
12 extraordinary important issue for us, because we do  
13 feel we've been deeply prejudiced by this. And so  
14 I want to just talk briefly about mistrial.

15 As an initial matter, Your Honor, the  
16 state in its response to our pleadings cites  
17 Rule 15 as the sort of standard by which remedies  
18 should be judged. And that's just incorrect as a  
19 matter of law. Brady is a due-process violation.  
20 Failure to disclose Brady information is, by its  
21 own terms, a constitutional violation.

22 It is not a mere violation of discovery  
23 rules for which limited remedies should be or can  
24 be crafted. When you violate Brady, you have  
25 violated one of basic principles of our

1 Constitution.

2 So the Court -- or the government citing  
3 Rule 15 as the fount for where remedies can be  
4 found is completely -- is just wrong.

5 I think in terms of how to look at this  
6 violation, we have to start with the supreme  
7 court's precedent and we have to start with the  
8 state's conduct and what the supreme court thinks  
9 about this kind of conduct.

10 And the state affirmatively, as I said a  
11 number of times, represented that no report had  
12 been prepared and had not responded to repeated  
13 requests from the defense.

14 Now, what the supreme court warned in  
15 Bagley was the prosecutor's failure, quote, to  
16 respond fully to a Brady request may impair the  
17 adversarial process. And the more specifically the  
18 defense requests certain evidence, thus putting the  
19 prosecutor on notice of its value, the more  
20 reasonable it is for the defense to assume the  
21 nondisclosure of the evidence does not exist. To  
22 assume that the nondisclosure of that particular  
23 item that's been requested suggests that it doesn't  
24 exist. And to make pretrial and trial decisions  
25 based on this assumption.

1 So that's exactly what the defense  
2 suffered because of what the state did. The state  
3 had this information and made representations to  
4 the Court and to the defense, did not respond to  
5 repeated requests.

6 And we made pretrial decisions about what  
7 motions to file, how to position this case, what  
8 experts to retain. It would be relevant to a  
9 medical expert to know that perhaps air wasn't  
10 circulating in a particular region thereby perhaps  
11 increasing the toxicity of whatever toxin might  
12 have been there -- the CO2, the organophosphates,  
13 rat poison, whatever it might have been.

14 That would have been relevant for an  
15 expert to look at. It also would have been  
16 relevant for us to do further examination into this  
17 exact issue. Is it true that having an off-center  
18 fire pit creates a radiant-heat barrier? 11 months  
19 we would have had to look at that particular issue.  
20 We could have conducted our own investigation into  
21 it. We could have drafted different motions  
22 relating to this exact issue.

23 Your Honor, my opening statement would  
24 have been different. I would have referenced this  
25 report. The cross-examinations of every single

1 witness that had testified would have been  
2 different. Because, as the Court has seen, in  
3 every witness we have attempted to touch on the  
4 causation issue, touch on the knowledge issue.

5 And with all of the experts and state's  
6 witnesses, we've also attempted to touch on the  
7 investigation issue, whether or not this  
8 investigation was sound. And this is particularly  
9 true for the medical witnesses that Ms. Do  
10 cross-examined. This type of information would  
11 have been critical for that cross-examination.

12 But more importantly, Your Honor, this  
13 failure to disclose this particular fact has  
14 systematically impacted this trial. The state has  
15 advanced to this court and Mr. Ray that Mr. Ray's  
16 guilty of manslaughter because of the way he  
17 conducted his ceremony.

18 And a result of that representation and  
19 theory, the state has been permitted to introduce  
20 evidence about Mr. Ray's philosophy and teachings,  
21 about a comparisons to other sweat lodges, and  
22 about comparisons to prior sweat lodges conducted  
23 by JRI.

24 And I don't know how this court would  
25 have ruled had a full-blown investigation into

1 Mr. Haddow's conclusions -- I don't know. None of  
2 us know. We can't turn the clock back and look at  
3 each of the judgment calls with a different lens.

4 Because, as the Court has said repeatedly  
5 and appropriately, that -- you know -- the Court  
6 just calls the issue that's before it. And there  
7 are 403 analyses that may have been different had  
8 different pieces of information been placed before  
9 the Court. There are rulings that may have changed  
10 and that may have altered substantial portions of  
11 this trial had this information been placed before  
12 the Court.

13 But the Court and this jury have been  
14 deprived of all of the that, of evidence suggesting  
15 that whatever Mr. Ray did, thought, said, believed,  
16 may not have had anything to do with this hidden  
17 design defect that might have caused all these  
18 deaths.

19 There is no way to evaluate how this  
20 Court's rulings might have been different. And  
21 there is no way to turn back the clock. And none  
22 of this, Your Honor, would have happened had the  
23 state done what it was supposed to do and disclosed  
24 the Brady material on April 29, 2010, when they got  
25 it; or had they been more candid with us in our

1 interview of Detective Diskin on June 16, 2010; or  
2 if they had been more candid in their 15th  
3 disclosure in which they state that there was no  
4 expert -- no report prepared; or if they had  
5 responded to any of the four letters in a timely  
6 manner; or if they had responded to the Court's  
7 order in a timely manner of -- the Court's order of  
8 December 1, 2010. They did none of those. None of  
9 those things.

10 And instead they chose, chose, to not  
11 produce that report. They had their reasons. But  
12 they chose not to do it. And case after case, Your  
13 Honor, that we cite in our brief at the last few  
14 pages of our brief -- I'm saying from page 12  
15 through 13. Case after case cited by our papers.

16 And, frankly, the right thing to do is to  
17 grant not only mistrial but a dismissal of the  
18 indictment. And this court, with this record  
19 before it, should grant our motion and should do  
20 the same.

21 Thank you, Your Honor.

22 THE COURT: Thank you, Counsel.

23 Mr. Hughes.

24 MR. HUGHES: Thank you, Your Honor.

25 Your Honor, to begin with, I wanted to

1 correct a statement in the state's motion or the  
2 response to the motion. We had indicated that  
3 Detective Diskin had a first conversation, first  
4 learned about Haddow shortly or sometime after the  
5 indictment.

6 Last night the detective was reviewing  
7 the indictment, discovered he actually mentioned to  
8 the grand jury that he had spoken to the  
9 environmental quality expert. So I did want to set  
10 that straight as far as, I believe, that was on  
11 page 2 of the state's response.

12 Your Honor, with respect to the merits of  
13 the motion and the merits of whether a mistrial  
14 should be granted in this case, I think it's  
15 incredibly important to look at the competing  
16 authority or the interlocking authority that  
17 governs disclosure. First of all, there is  
18 Rule 15, and, secondly, there is Brady and the  
19 progeny of cases that discuss Brady.

20 With respect to Brady, the three elements  
21 that Mr. Li focused on are, essentially, the  
22 important elements. Was there a nondisclosure?  
23 Was it exculpatory? Was it material?

24 And it's the state's contention that with  
25 respect to two of the three elements, the defense

1 has not established or can they establish that a  
2 Brady violation occurred.

3 Specifically, the email itself, which is  
4 attached to the state's response, it's very clear  
5 it's not exculpatory information. It's inculpatory  
6 information. It was not disclosed due to an  
7 oversight in this case. The state disclosed over  
8 8,000 pages in this case. And this particular  
9 email was believed to have been disclosed but was  
10 not.

11 The state had originally intended to use  
12 this expert until we had some questions about maybe  
13 the extent of his qualifications. But the state  
14 had intended to use him.

15 The information in that report is  
16 inculpatory. Each of the factors discussed in that  
17 report are factors that are controlled by  
18 Mr. Ray -- the amount of the humidity in there, the  
19 number of participants that leads to the carbon  
20 dioxide, the amount of heat in there. Those are  
21 all factors that Mr. Ray contributed to or caused.

22 With respect to the impermeable barrier,  
23 that's information that the defense already had and  
24 that Mr. Ray, going into the structure, would have  
25 known about.

1 The information in that report -- and  
2 there is a number of bullet points. Each one  
3 points to factors that are contributing but not the  
4 cause of Ms. Neuman's death. Mr. Li argued a  
5 number of times that that report identifies another  
6 possible cause of death. It does not. It talks  
7 about contributing factors, meaning the carbon  
8 dioxide or the humidity that were within the  
9 structure.

10 In this case there is a number of cases  
11 that are very specific on point from the State of  
12 Arizona. The cases the state has cited, though, in  
13 its response, in particular the Bracy and the  
14 Jensen cases, I think, are important.

15 Bracy indicated that assuming it was  
16 undisclosed, exculpatory information, if it's  
17 revealed at trial and the defense has an  
18 opportunity to present it to the jury, there is no  
19 Brady violation.

20 In this case the defense hasn't even  
21 begun it's case. The state is only midway through  
22 it's case. We've only heard testimony so far from  
23 one witness who has been involved in the  
24 construction of sweat lodge. That's Mr. Mercer.  
25 Mrs. Mercer is still on the stand so is still

1 available to be cross-examined. Mr. Mercer can be  
2 called back if the defense had questions about the  
3 construction.

4 In addition to that, the defense had an  
5 opportunity to inspect the evidence. Mr. Li argued  
6 that the structure was destroyed. But what he  
7 isn't arguing is that before it was destroyed, YCSO  
8 took a number of samples where they cut through the  
9 very top, the rubber -- the "big rubber deal," as  
10 Mr. Mercer called it, all the way down to the  
11 interior bits of blanket. And they did that in a  
12 number of locations around the sweat lodge.

13 Those were made available to the defense  
14 for testing. And also the defense was able to  
15 actually see those when they went out and reviewed  
16 the evidence in this case.

17 Your Honor, Brady in particular dealt  
18 with the situation where information about a  
19 witness's bias was not disclosed to the defense,  
20 and it should have been in the Bracy case.  
21 However, the Court found that it was not material  
22 because there was so much other evidence that was  
23 already available to the defense to know about that  
24 witness's bias.

25 In this particular case the factors that

1 are discussed in Mr. Haddow's report is information  
2 that has been available to the defense from the  
3 beginning up through recently in this particular  
4 case. In Detective Diskin's interview, which was  
5 characterized as Detective Diskin sort of artfully  
6 trying not to talk about carbon dioxide, beginning  
7 on page 47 of his interview -- and that's attached  
8 or it's marked exhibit in this case -- he talks  
9 about carbon dioxide poisoning. Ms. Do follows up  
10 with him as to was that a contributing or what are  
11 the factors that you know that could have  
12 contributed to the death?

13 And he says, no. Carbon dioxide  
14 poisoning and hyperthermia could both have  
15 contributed. That was an interview that occurred  
16 back in June of 2010.

17 In this case Dr. Mosley, one of the  
18 medical examiners, was interviewed and was asked  
19 about a differential diagnosis or what else could  
20 have contributed or caused the deaths. Dr. Mosley  
21 talked about CO2 and talked about the fact that  
22 they had a lack of oxygen because of the conditions  
23 they were in.

24 That is attached to the state's  
25 supplement that was filed about a half an hour

1 after the response itself was filed last night.

2 Dr. O'Connor, who is a medical expert  
3 that was retained by the plaintiff's attorneys in  
4 the cases against Mr. Ray, also prepared reports  
5 that talked about CO2 poisoning being a  
6 contributing factor to the deaths. And those  
7 reports were disclosed. I don't know if they were  
8 disclosed in the civil case. But they were  
9 definitely disclosed by us in our case.

10 There is an interview that we cite about  
11 a fellow named Randall Potter. And he talked about  
12 the conditions in the sweat lodge. That's cited in  
13 our motion. He talks about by his calculations,  
14 the same air inside the sweat lodge was breathed  
15 approximately four times.

16 And he also talks about the fact that  
17 there was very little air circulation back in that  
18 back corner.

19 There is Mr. Sundling's report.  
20 Mr. Sundling is an expert in sweat lodges. We've  
21 cited some of his statements, again, where he talks  
22 about the fact that there is, basically, an  
23 impermeable coverings in the sweat lodge that  
24 wouldn't have allowed air to come in and out except  
25 through the door. The air would be stale in the

1 back where the victims were sitting. He also talks  
2 about the offset pit, as did a number of the other  
3 participants who are cited in the state's response.

4 The state disclosed the notes from the  
5 meeting with the medical examiners. And those  
6 notes are also attached to the state's supplement  
7 to the response where carbon dioxide is discussed.

8 Your Honor, throughout the case the  
9 defense has been aware that carbon dioxide was a  
10 contributing factor, at least according to  
11 Dr. O'Connor, to possibly Dr. Mosley. Although he  
12 ruled that out as a differential diagnosis.

13 According to the expert, Mr. Sundling,  
14 Mr. Li makes a point, and I think there is some  
15 validity. But there is a difference between a lay  
16 person's testimony and an expert's testimony. In  
17 this case they've heard and had reason to know from  
18 early on in this case from Dr. O'Connor's reports.  
19 He's a medical expert. From Dr. Mosley. He's the  
20 medical examiner. Both talking about CO2. And  
21 from Mr. Sundling, who talked about the conditions  
22 in the sweat lodge -- who is an expert on sweat  
23 lodge conditions and construction.

24 Quite simply, that information that is in  
25 Mr. Haddow's report is cumulative to or in addition

1 to the information that was already available in a  
2 very similar way that the Bracy case talked about  
3 the information that was not disclosed regarding a  
4 witness's bias. In that case it's determined -- in  
5 that case it's determined it should have been  
6 disclosed. It was exculpatory, but yet there was  
7 no violation because it was not material due to the  
8 fact it was cumulative or in addition to other  
9 information that was available.

10 With respect to the defendant's request  
11 for a mistrial in the case, it's not an appropriate  
12 remedy in this case. Again, Brady violation does  
13 not occur according to the Bracy case and the  
14 Jensen case if the information is disclosed mid  
15 trial, which is what occurred in this particular  
16 case.

17 So we're left with a 15.1 analysis and  
18 Rule 15 in general analysis. Dismissal is the  
19 ultimate sanction. If the defense wants to call  
20 Mr. Haddow as an expert, they certainly can do  
21 that. If they want to do an interview and gather  
22 more information, they can do that as well. It  
23 will be several weeks at least before the defense  
24 begins their case. If they want to go try and find  
25 an additional expert on their own if they're

1 unhappy with Mr. Haddow's qualifications, they have  
2 time.

3 It's the state's position they have had  
4 quite a bit of time and have known about the CO2  
5 issue and the off-set fire pit issue and the  
6 membrane structure of the sweat lodge. They've  
7 know about that for quite a period of time.

8 The defense took the position in their  
9 opening argument that Mr. Ray did not have anything  
10 to do with the sweat lodge construction. They've  
11 tried to make that clear through the questioning of  
12 witnesses in this case.

13 Within a couple months of the deaths in  
14 this case, the state received what the defense is  
15 now calling a "white paper," a very long letter  
16 from the defense that sets forth quite a few  
17 reasons, in the defense's opinion, why the crime  
18 wasn't committed. And they emphasized in that  
19 document that Mr. Ray did not build the sweat lodge  
20 and wasn't responsible for how the sweat lodge was  
21 constructed.

22 Your Honor, all that information taken  
23 together shows that the defense has taken a single  
24 nondisclosed email, which the state admits, in good  
25 practice at least, should have been disclosed and

1 was not, out of some 8,000 pages that the state has  
2 disclosed and is asking for the ultimate sanction  
3 of a mistrial.

4 That overlooks the rights of the victims  
5 in this particular case. It overlooks the fact  
6 that the defense has an opportunity still to call  
7 Mr. Haddow if they want. It overlooks the fact  
8 that the defense has been aware of the CO2 issue  
9 since early or mid last year and that the defense  
10 has had the opportunity to follow up and ask the  
11 medical examiner and also has had the reports from  
12 Dr. O'Connor about the CO2 issue.

13 It overlooks all that and skips right to  
14 the conclusion that, A, this is an exculpatory  
15 email, which is it's not. The email point by point  
16 talks about factors that Mr. Ray controlled.  
17 Again, the amount of the carbon dioxide, the amount  
18 of the humidity, the amount the heat that was in  
19 there, and the length of time that people were  
20 exposed to those conditions.

21 Given all that, Your Honor, the state  
22 would ask the motion for mistrial be denied.

23 THE COURT: Thank you, Counsel.

24 We're going to take about a 10-minute  
25 recess. Thank you.

(Recess.)

THE COURT: The record will show the presence of the defendant, Mr. Ray, and the attorneys.

Mr. Li.

MR. LI: Your Honor, I just have very brief response to the state's argument. The first just basic response is that the cases cited by the state, Jensen, and Bracy, have been, essentially, overruled by Bagley, by United States Supreme Court precedent, and that these cases cited by the state are no longer valid for the proposition that they're citing for.

In State v. Jensen, which was a 1981 case, it was decided before the materiality standard for Brady violations were explained by Bagley and Kyles. And in, Jensen, for instance, the Arizona court explicitly relies on an obsolete materiality standard. The Court quotes prior supreme court case law relating to the standard of materiality, which then the supreme court explicitly replaced in Bagley and Kyles. And that was in Agurs, an earlier case, the supreme court had stated that the materiality standard was whether the undisclosed material would have created a reasonable doubt.

Subsequent to that case and subsequent to the Jensen case, and, frankly, Your Honor, the Bracy case, that standard was replaced by Bagley and Kyles, in which -- replaced with a lower standard, which is -- and this is United States Supreme Court precedent -- whether there is a reasonable probability that the evidence would have affected the outcome in some way with no requirement that he would have been found innocent had the evidence been timely disclosed.

So the various cases that the state cites for the proposition that mid trial disclosure of information is not a Brady violation has been overruled by the United States Supreme Court.

I'd also note that the sort of granddaddy case that kind of deals with these types of issues is another federal case. I believe it's United States v. Leka, L-e-k-a. And it's cited in our brief.

But, essentially, it sets forth the various requirements to find a Brady violation, and it sets forth what the problem is with making disclosures. And in Leka it was made on the eve of trial as opposed to when trial was underway.

It says, essentially, the opportunity to

use the information when disclosed on the eve of trial or when trial is underway is impaired. The Court acknowledges how difficult it can be to assimilate new information, however favorable, when a trial is already prepared on the basis of the best opportunities and choices then available. And this is true for a number of reasons. The defense may be unable to divert resources from other initiatives or obligations that are -- or may seem more pressing. The defense may be unable to assimilate the information into its case. And new witnesses or developments tend to throw existing strategies and preparations into disarray.

And we're not saying that every single mid trial disclosure violates due process. But when it's as fundamental as this where it deals with all three issues -- causation, the quality of the investigation, the state of Mr. Ray's knowledge -- and all of the work that we've done in preparing for this case -- you know, I think the Court has seen, we heard a lead about organophosphates, so we followed. We heard a lead about rat poison. We followed it. We heard a lead about wood. We followed. So we followed every lead that has been shown to us by the state's

evidence.

And had we been shown this particular evidence about the environmental conditions, we would have followed that too.

But the point is, that when you disclose it in the middle of trial, it is not, as the Court has said, the time for further investigation. This is trial. And we are here -- I'm, basically, living here working on nothing but this case. And this is all our team is doing is working on this case.

And we're not investigating things, unless they pop up. But what we're concentrating on is every day in court. And the idea that, oh, well, now we can just sort of do some more investigation and -- you know -- no harm, no foul, and the idea that the state would cite to the Court case law that is overruled, essentially, for this proposition is very problematic.

I'd also make just a few minor points then, I'll sit down. With respect to the cumulative issue, again, the state never addressed the idea of the quality of the investigation issue. The state doesn't address that. The fact that they've had this in their files and they've never

1 pursued it. They just don't address that.

2 More importantly, in terms of the logical  
3 gaps in the state's argument, the state says that  
4 we were on notice because Dr. Mosley considered  
5 carbon dioxide as a potential cause of death and,  
6 therefore, there is no harm because we already  
7 knew. But then the state in the same breath says,  
8 and then Dr. Mosley ruled it out.

9 Well, now you have exactly the situation  
10 in those two cases that I cited to the Court -- the  
11 New York case and the federal case -- in which one  
12 expert says one thing or there is an opinion that  
13 says one thing, in this case, carbon dioxide; and  
14 then there is another opinion that says something  
15 else, in Dr. Mosley's case.

16 So this is exactly the situation where  
17 the evidence is actually unique and disinterested,  
18 exactly as the case law provides.

19 The final thing is, and with all due  
20 respect to the victims' bill of rights -- I think  
21 I've been hopefully respectful to the tragedy that  
22 has been suffered by the families. The law is that  
23 the constitutional rights of a defendant take  
24 precedent when they've been violated. They take  
25 precedent over any other rights, including whatever

1 the state thinks it's rights to a fair trial are  
2 and whatever victims' rights bills there are in the  
3 state of Arizona. This is the United States  
4 Constitution. It takes precedence.

5 And I would submit, Your Honor, that to  
6 the extent that the victims have been prejudiced by  
7 this situation that we're currently in, it is not  
8 because of the defense. The prejudice to the  
9 victims has been created by the state's failure to  
10 disclose what it was required to disclose  
11 repeatedly and its conscious decisions not to  
12 disclose it and to not be candid when we literally  
13 were talking about carbon dioxide with  
14 Detective Diskin -- and I don't want to accuse Bill  
15 of anything. I just don't remember if it was him  
16 or if it was somebody else.

17 But when the office of the county  
18 attorney, that a prosecutor was sitting there next  
19 to Detective Diskin and we were asking questions --  
20 and it was obvious. We didn't understand what they  
21 were talking about with carbon dioxide. You know.  
22 That they did not say, hey, you know what. A month  
23 and a half ago I talked to this guy, Richard  
24 Haddow. And he opined that it might have been  
25 carbon dioxide, and that's what I base my opinion

1 on.

2 And the last thing I'd say with respect  
3 to that is this idea -- I think Mr. Hughes said  
4 that Detective Diskin mentioned in the grand jury  
5 something about Mr. Haddow. Well, recall, Your  
6 Honor, that Mr. Haddow's report comes out in  
7 April 29, 2010. The Grand Jury indicted Mr. Ray  
8 about two and a half months, three months, before.

9 So if they had -- if the detective had  
10 discussed carbon dioxide in the grand jury based on  
11 discussions with Mr. Haddow, then the state's  
12 representation in its papers that there have only  
13 been two contacts with Mr. Haddow, one on the 29th  
14 in April and one subsequent in which they had a  
15 short interview, that would be incorrect. Then  
16 there would be some third or fourth or fifth  
17 contact with Mr. Haddow about the environmental  
18 conditions before the grand jury met.

19 So I don't know what to do with all of  
20 that, Your Honor. And the reason why mistrial is  
21 the only possible outcome is because of this  
22 continual lack of candor about who knew what when  
23 and what they were doing there and what information  
24 do they have. And it shouldn't have to be that  
25 Ms. Do has to write four letters requesting or that

1 we have to come to the Court and -- you know --  
2 file discovery motions and ask for sanctions. It  
3 just shouldn't be like that.

4 Prosecutors have a higher duty than that.  
5 This whole process has been infected by this  
6 continual lack of candor, Your Honor.

7 MR. HUGHES: Your Honor, if I can address just  
8 the issue of Bracy and Bagley.

9 THE COURT: Okay.

10 MR. HUGHES: Bagley did not overrule Bracy.  
11 Bracy did come out a month or two before Bagley,  
12 and both cases, Bracy and Bagley, discuss a prior  
13 supreme court case Agurs, which discussed the  
14 materiality standard.

15 The Bagley case -- and specifically I  
16 call the Court's attention to page 681. And  
17 following from there discusses a situation that  
18 gave rise in the Strickland case, which was a  
19 completed case where evidence didn't come out at  
20 trial at all. That's a different situation than  
21 what Bracy was discussing, which is a situation  
22 where the evidence comes out mid trial when the  
23 defense -- particularly in this case where the  
24 defense hasn't even begun their case and it's  
25 several weeks away.

1 So Bagley did not overrule the Bracy  
2 case. To the extent that Bagley was talking about  
3 the Strickland and how Strickland applied the  
4 Augers case, that was specifically dealing with the  
5 situation in Strickland where evidence was not  
6 presented at all during trial. It was a completely  
7 different kettle of fish than what we have here.

8 THE COURT: Ms. Polk, Mr. Hughes, I had  
9 indicated I would consider some other legal matters  
10 conditionally, and that's just not practical in  
11 this circumstance. This issue predominates  
12 obviously.

13 I'll note right now that I do find there  
14 was a Brady violation. And the question is the  
15 appropriate remedy. So technically the matter is  
16 under advisement at this time. I have a lot of  
17 cases to look at. I'll rule as soon as I can.

18 We're in recess.

19 (The proceedings concluded.)
